

Tomer Naydnov

Software Engineering Graduate | M.Sc. Student in Industrial Engineering & Management

Phone: +972-50-5752650 | Email: tnaydnov@gmail.com | GitHub: github.com/tnaydnov | LinkedIn: linkedin.com/in/tomer-naydnov

PROFILE:

Software Engineering graduate and current M.Sc. student in Industrial Engineering and Management, with practical experience translating client and user needs into educational programs and digital products.

In a small EdTech team, I have worked across the delivery process - from understanding requirements and planning solutions to breaking down tasks, coordinating execution, testing, and improving products based on feedback from the field.

EDUCATION:

M.Sc. in Industrial Engineering and Management | Shenkar College of Engineering, Design and Art | **2026-Present (Expected 2028)**

B.Sc. in Software Engineering | Ben-Gurion University of the Negev | 2021-2025

EXPERIENCE:

Programming Instructor & EdTech Content Developer

Nitzanim | 2023 - Present

- Work with clients and educational stakeholders to understand needs, clarify requirements, define deliverables, and align expectations throughout the development process.
- Plan and develop educational products, including syllabuses, presentations, lesson plans, instructor guides, and programming exercises.
- Founded, planned & developed **Arc, an internal learning platform** used across large-scale educational programs, by identifying field needs, planning improvements, testing workflows, and coordinating with instructors and relevant teams.
- Build project timelines and Gantt plans, break initiatives into actionable tasks, and support their execution from initial planning to final delivery.

Technical Support Roles

IDF, Israel Electric Corporation and Isracard | 2020-2023

- Provided Tier 2 technical support in large organizations, including Active Directory, Citrix, remote access, hardware, software, and connectivity troubleshooting.
- Diagnosed user and system issues, documented solutions, and communicated with users and technical teams.

PROJECTS:

[Eventa](#) - Independent Mobile Web Product | Mobile-first platform for social connections at weddings

- Designed and developed a mobile-first web platform with QR onboarding, guest profiles, matching, and private messaging.
- Defined the initial user journey and iterated on onboarding, privacy, accessibility, and website messaging based on practical use cases.

[Applytide](#) - Independent Full-Stack Project | Job application management platform

- Developed a platform for organizing job applications, documents, reminders, analytics, and interview preparation.
- Planned the main workflows and implemented the system using React, TypeScript, FastAPI, PostgreSQL, Redis, Docker, and the OpenAI API.

SKILLS:

TECHNICAL

Python, Java, SQL, REST APIs,
Git/GitHub, Docker

PRODUCT & PROJECT WORK

User flows, requirements documentation,
QA and workflow testing, technical writing

AI TOOLS

LLM-based tools, prompt design,
OpenAI API
