PROFILE

Software engineer who loves creating products, from understanding user needs and shaping ideas to implementation, launch and continued improvement. Currently studying toward an M.Sc. in Industrial Engineering & Management.

EXPERIENCE

EdTech Project Leader & Content Developer | Nitzanim

Nitzanim tenure: 2023-present. Earlier responsibilities included programming instruction.

- Clarify client and educational needs, define requirements and deliverables, and align stakeholders.
- Develop syllabuses, presentations, lesson plans, instructor guides and programming exercises.
- Plan delivery with timelines and Gantt plans, break work into tasks, and coordinate testing and rollout.

Tier 2 Technical Support | IDF, Israel Electric Corporation & Isracard

2020-2023

Diagnosed user and system issues across Active Directory, Citrix, remote access, hardware, software and connectivity; documented solutions and communicated next steps.

EDUCATION

M.Sc. Industrial Engineering & Management | 2026-present, expected 2028

Shenkar College of Engineering, Design and Art

B.Sc. Software Engineering | 2021-2025

Ben-Gurion University of the Negev

SELECTED PRODUCTS & ENGINEERING

With one coworker, I co-develop Arc and Browser Coder. Both are live, continually supported and expanded, serving 3,000+ students, instructors and managers across the combined platform.

Arc Academy | Co-developer | 2026-present

Build a learning platform connecting curriculum, classroom delivery, student work, feedback and reporting, with continued work on product workflows, architecture, testing and rollout.

Browser Coder | Co-developer | Since April 2026

Build and improve a browser coding environment: classroom embedding, debugging, execution feedback and Python Turtle graphics.

Applytide | Independent full-stack project | Source archived

Designed and built job-application workflows, document tools, reminders and interview preparation using React, TypeScript, FastAPI, PostgreSQL, Redis, Docker and the OpenAI API.

Eventa | Independent product | Discontinued; source public

Designed, built and operated a mobile web product for event-based social connection: QR entry, profiles, matching and messaging with Next.js, TypeScript and Supabase/PostgreSQL.

SKILLS

Engineering: Python, Java, TypeScript, SQL, REST APIs, Git/GitHub, Docker.

Product & delivery: Requirements, user flows, project planning, QA, technical writing.

AI tools: LLM-based tools, prompt design, OpenAI API.
